

Durability

Paradise Outdoor Kitchens offer contemporary style coupled with rugged durability for many years of outdoor enjoyment. Constructed of marine-rated polymer, naturally weather-resistant wood and exterior-grade hardware, your Paradise Outdoor Kitchen will perform beautifully under even the heaviest usage, with virtually no annual maintenance.

CUSTOM BUILD YOUR OUTDOOR KITCHEN IN THREE EASY STEPS!

1

Choose your appliances. Your kitchen can accommodate any brand or model of grill, including natural gas, LP, electric or charcoal units. Choose additional appliances such as a side burner, sink, refrigerator, drop-in cooler, beer tap, warming drawer, etc.

2

Choose and measure a site for your outdoor kitchen. We'll help you plan a configuration that optimizes your space.

3

Choose your cabinets according to your storage needs and cooking interests. Then choose a door style and polymer color to create the kitchen that suits your tastes and complements your home architecture.

PATIO
Comfort & Style

THE PLEASURE OF OUTDOOR DINING

What pleasure can rival morning coffee on the patio, an afternoon spent grilling steaks while the kids splash in the pool, a starry evening on the patio in the company of friends, preparing and enjoying a fine meal with ingredients fresh from the farmer's market?

Contemporary al fresco dining demands an outdoor kitchen worthy of your style and culinary ambitions. Paradise Outdoor Kitchens provide the quality construction, supreme functionality and durable beauty you require, in pre-designed or customized island or wall installations. Our kitchens are constructed of handsome, weather resistant materials that make cleaning easy and keep annual care to a minimum.

THE TUSCAN TEAK™ SERIES

The Tuscan Teak™ Series is crafted from durable Everlast™ polymer and finished with Iroko, a water-resistant, non-endangered African hardwood traditionally used to make boat decks and outdoor furniture. We use this beautiful teak-like wood to create exceptionally stylish cabinet doors, drawer-fronts and trim pieces for your outdoor kitchen. The Tuscan Teak™ components are finished with an eco-friendly water-based protectant that brings out the grain, color and sheen of the wood and protects against weathering and food spills. A annual application* of protectant keeps your outdoor kitchen beautiful for many years.

*In some climates, two applications per year may be required.

Tuscan Teak™ weather resistant wood and black coral polymer provides lush, durable beauty.

THE EVERLAST POLYMER™ SERIES

The Everlast™ Polymer Series is created from a finely finished yet durable polymer that will not peel, rot, fade, split or warp. Available in a range of styles and colors, in pre-designed islands or custom island and wall layouts, each outdoor kitchen in the Everlast™ Polymer Series is protected by UV inhibitors to guard against fade and is virtually maintenance-free. All cabinet surfaces are easy to use and clean, and FDA-approved for contact with food, so you can enjoy years of carefree al fresco entertaining with this affordable outdoor kitchen series.

Craftsmanship

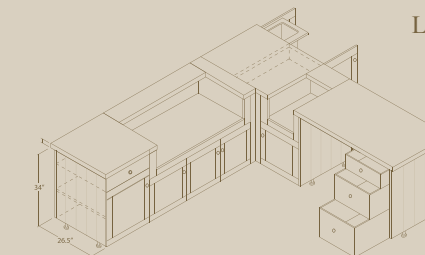

Paradise Outdoor Kitchens are constructed of the finest polymer and wood materials, with impeccable elegance and attention to detail. Finished ends and backs are standard. European-style stainless steel hidden hinges and weather-beating cabinet hardware add detail and durability. Optional countertops are available in Granite or soapstone which is naturally non-porous for a pleasing look that's safe outdoors all year round. Paradise Outdoor Kitchens can be installed in hours verses days by a small crew with light equipment, so your grounds and patio are not impacted.

Most popular configurations:

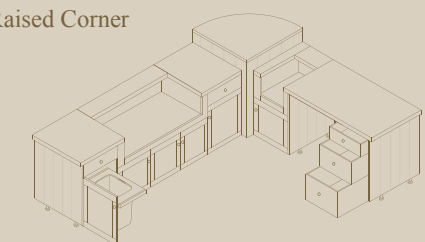

Straight

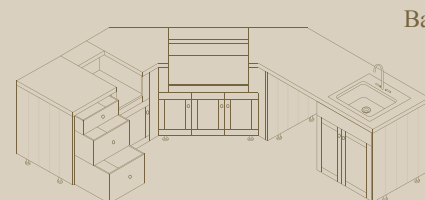

L-Shape

Raised Corner

Bat Wing

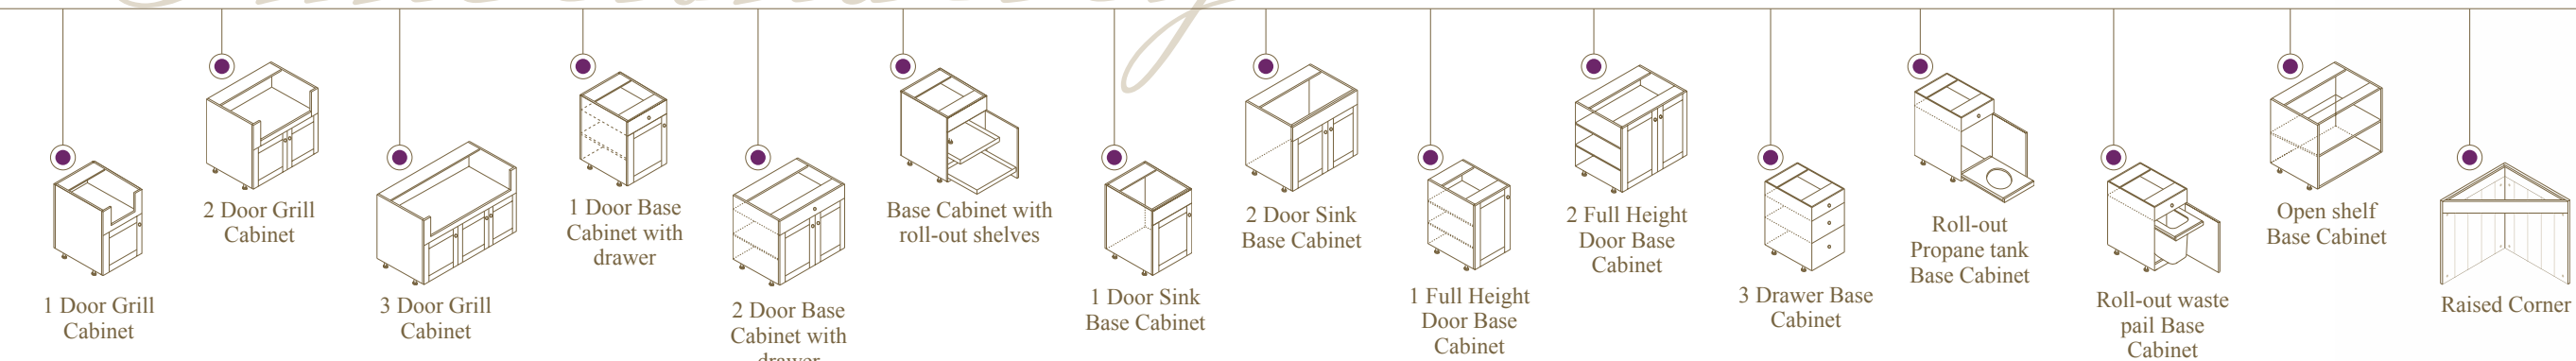

- Roll-out waste pail.
- Adjustable shelf for maximum storage.
- Three-drawer base unit with concealed galvanized steel ball bearing drawer slides.

Functionality

Paradise Outdoor Kitchens are customized from the modules seen at left. Your kitchen can be configured according to your unique culinary interests, storage requirements and available space. Their modularity also makes them easy to install and move, and easy to expand at a later time. Our units are designed to accept any model or brand of outdoor appliance. (An insulating liner is required for all grills and/or heating units unless manufacturer specifies otherwise.)

Everlast™ Polymer and Tuscan Teak™ Series cabinets are available in Ocean Sand or Black Coral. All end and back panels come grooved for a planked look.
